

# Splunk4Rookies - Dashboard Studio

## Lab Guide

### Overview

The purpose of this workshop is to familiarize Splunk users with Dashboard Studio.

### Prerequisites

In order to complete these exercises, you will need your own Splunk instance. Splunk's hands-on workshops are delivered via the [Splunk Show portal](#) and you will need a Splunk.com account in order to access this.

If you don't already have a Splunk.com account, please create one [here](#) before proceeding with the rest of the workshop.

### Troubleshooting Connectivity

If you experience connectivity issues with accessing either your workshop environment or the event page, please try the following troubleshooting steps. If you still experience issues please reach out to the team running your workshop.

- **Use Google Chrome** (if you're not already)
- If the event page (i.e. <https://show.splunk.com/event/<eventID>>) didn't load when you clicked on the link, try **refreshing the page**
- **Disconnect from VPN** (if you're using one)
- **Clear your browser cache and restart your browser** (if using Google Chrome, go to: Settings > Privacy and security > Clear browsing data)
- **Try using private browsing mode** (e.g. Incognito in Google Chrome) to rule out any cache issues
- **Try using another computer** such as your personal computer - all you need is a web browser! Cloud platforms like AWS can often be blocked on corporate laptops.

## Lab 1 – Create a Dashboard

### Create the Dashboard

1. Navigate to the **Search & Reporting** app and click on the **Dashboards** tab in the menu bar. Click on the **Create New Dashboard** button.

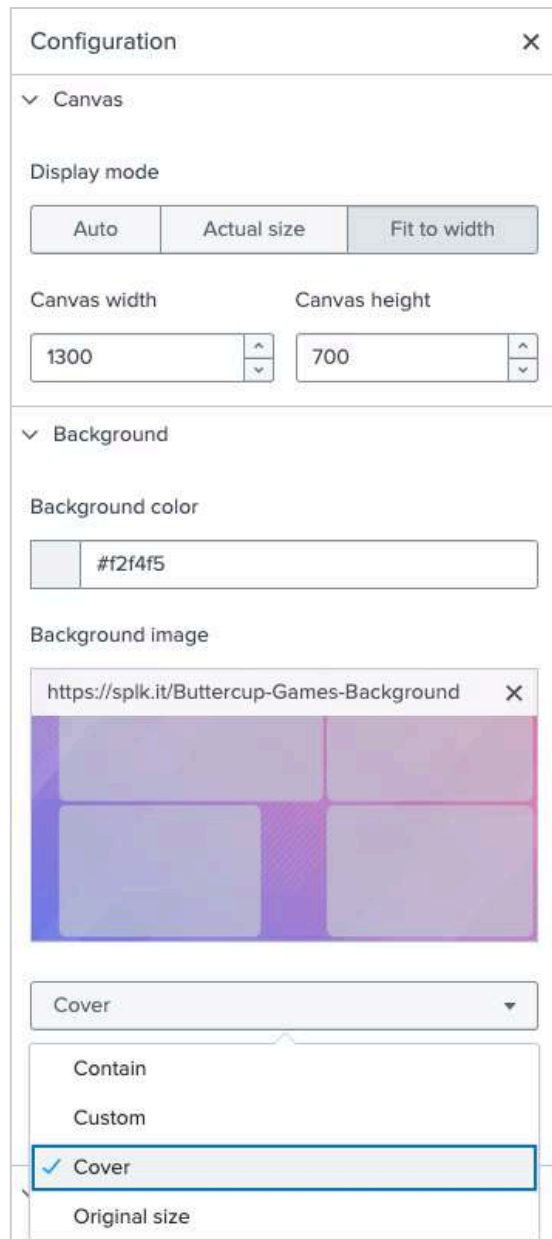

2. Title your dashboard **Buttercup Games Online Store <your name>**
3. Select the **Dashboard Studio** option to build your dashboard.
4. Select the **Absolute** layout.
5. Click on **Create**.

## Setup the Canvas

- Using the **Configuration** panel, make sure the Display Mode is set to **Fit to Width**.
- Change Canvas Width to **1300** and Canvas Height to **700**.
- In the **Background Image** section, paste the following image URL into the **Enter URL** box:  
<https://splk.it/Buttercup-Games-Background>
- Change the background image size setting from **Contain** to **Cover**.

The screenshot shows the 'Configuration' panel with two main sections: 'Canvas' and 'Background'.

**Canvas Section:**

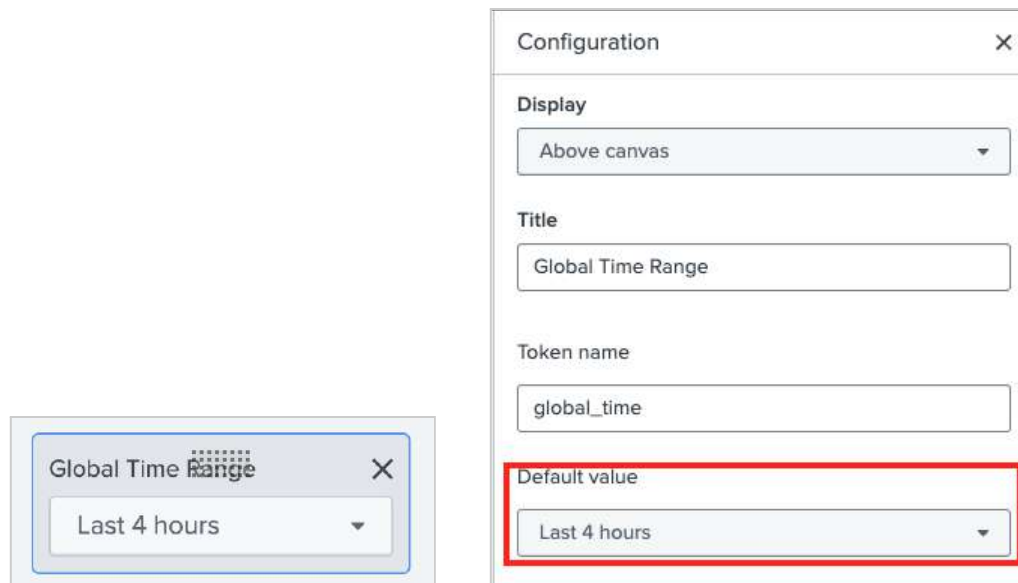

- Display mode:** Three buttons are shown: 'Auto', 'Actual size', and 'Fit to width'. 'Fit to width' is selected.
- Canvas width:** A text input field containing '1300'.
- Canvas height:** A text input field containing '700'.

**Background Section:**

- Background color:** A color picker showing a light blue color with the hex code '#f2f4f5'.
- Background image:** A text input field containing the URL 'https://splk.it/Buttercup-Games-Background'. Below the input is a preview of the image, which is a purple and blue abstract design.
- Size setting:** A dropdown menu with 'Cover' selected. Below the dropdown, a list of options is shown: 'Contain', 'Custom', 'Cover' (highlighted with a blue border and a checkmark), and 'Original size'.

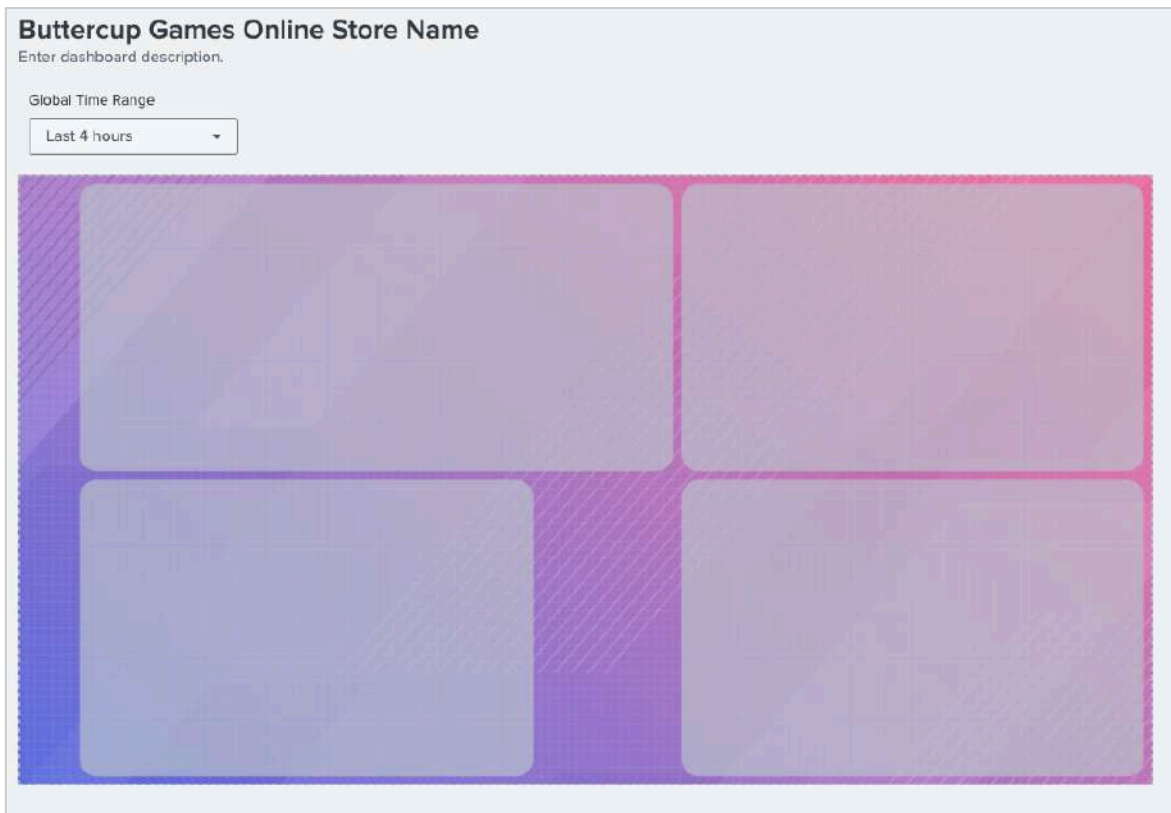

## Change the Time Range Picker

10. Change the default time range for the dashboard by clicking on the **Global Time Range** input and in the **Configuration** panel changing the **Default Value** to **Last 4 hours**.

11. Save your changes by clicking on the **Save** button in the top right hand corner.

At this point in the workshop, the Buttercup Games dashboard looks like this:

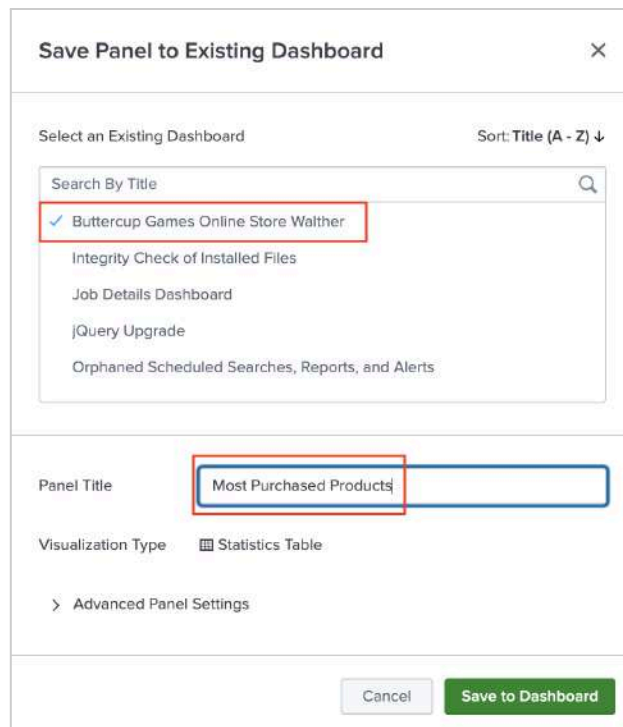

## Lab 2 – Add a Table

### Add a Table

1. Navigate to the **Search** tab.
2. Add the following search into the Search bar:

```
index=main sourcetype=access_combined action=purchase status=200
| lookup product_codes.csv product_id
| stats count as Purchases by product_name product_price
| table product_name Purchases product_price
| eval Revenue=Purchases*product_price
| table product_name Purchases Revenue
| sort -Purchases
| rename product_name as "Product"
| head 8
```

3. Click on **Save As > Existing Dashboard**

The screenshot shows the 'Save Panel to Existing Dashboard' dialog box. It has a title bar with a close button. Below the title bar, there is a section 'Select an Existing Dashboard' with a search bar labeled 'Search By Title' and a sort dropdown 'Sort: Title (A - Z)'. A list of dashboards is shown, with 'Buttercup Games Online Store Walther' selected and highlighted with a red box. Below this list, there is a 'Panel Title' field with the text 'Most Purchased Products' and a red box around it. Underneath the title field, there is a 'Visualization Type' section with a radio button selected for 'Statistics Table'. At the bottom, there are two buttons: 'Cancel' and 'Save to Dashboard'.

4. Select the dashboard you just created and title the panel **Most Purchased Products**.
5. Click on **Save to Dashboard** and then on **View Dashboard**.

## Configure the Table

- Put your dashboard into edit mode by clicking on the **Edit** button at the top of the screen. Click on the table you just added and in the **Configuration** panel, under **Data sources**, edit the **Most Purchased Products search** data source.

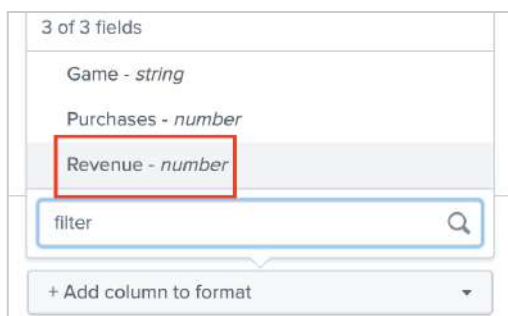

- Change the **Time range** to **Input** to your search uses the Global Time Range input we configured earlier. Click on **Apply & Close** to save it.

- In the **Color and style** section, change the **Background** to **transparent**.

- In the same section, under **Column-specific formatting**:
  - Click on **+ Add column to format** and select **Revenue - number**.

- Click on the pencil/edit button.

- c. Change the **Units Position** option to **Before** and for the **Unit Label** enter a dollar symbol (\$).
- d. Increase the **Precision** value to “**2 (0.00)**” and set **Thousand Separators** to **On**.

Column formatting: "Revenue"

Units position	Unit label
Before	\$
Precision	Thousand separators
2 (0.00)	Off On

- e. Click on **+ Add Column to format** again, but this time choose the **Purchases - number** column.

Column Formatting: "Purchases"

Units Position	Unit Label
Before	\$
Precision	Thousand Separators
2 (0.00)	Off On

- f. Click on the pencil/edit button.
- g. Change the **Dynamic Coloring** option to **Text**.
- h. For the **Preset Palette**, choose **Light Colors**.
- i. For this exercise, enter the following five ranges:

**240 and greater**  
**230 to 240**  
**220 to 230**  
**200 to 220**  
**Less than 200**

Dynamic Coloring

↓ ↑

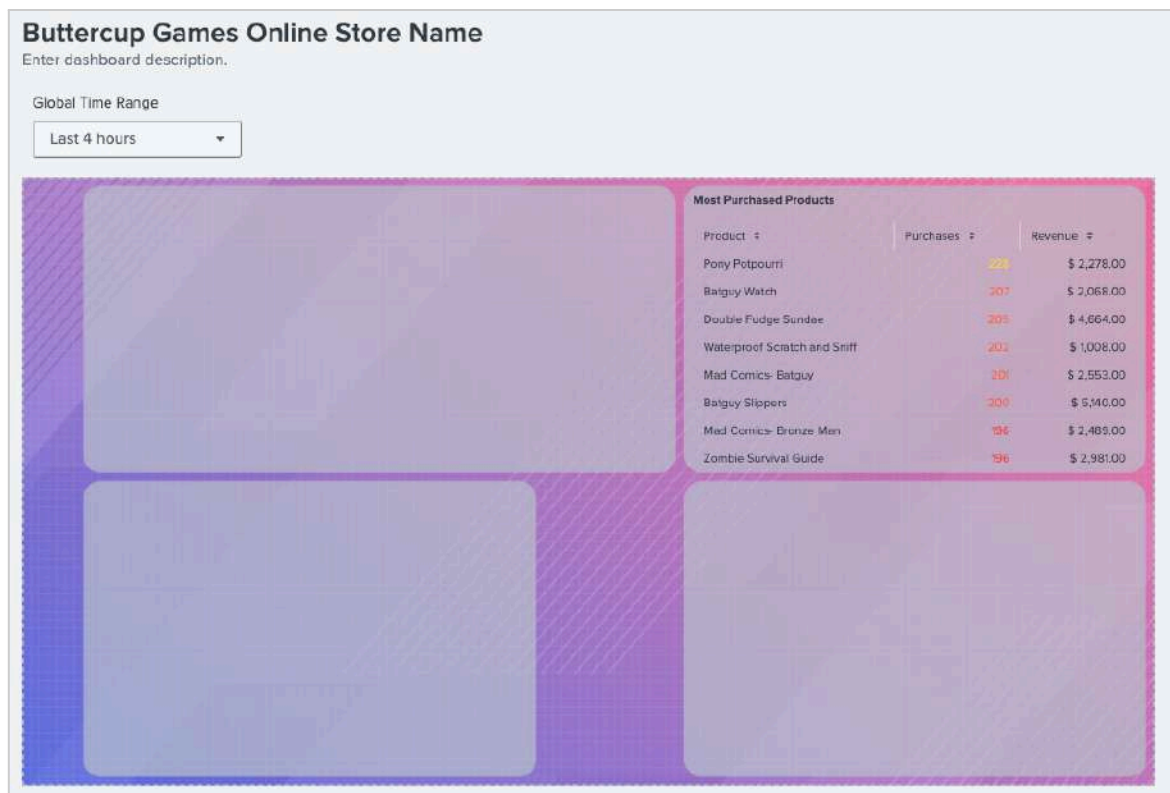

↓↑ + Add Range

240	and greater	×
230	to 240	×
220	to 230	×
200	to 220	×
less than 200		×

- 10. Move and resize your table to center it in the top right panel.

At this point in the workshop, the Buttercup Games dashboard looks like this:

## Lab 3 – Add Chart Visualizations

### Add a Pie Chart Visualization

1. Click on the add chart icon (  ) in the editing toolbar, and then select **Pie**.
2. In the **Select data source** panel, click on **+ Create search** and add the following search into the **SPL query** box:

```
index=main sourcetype=access_combined action=purchase status=200
| lookup product_codes.csv product_id
| stats count values(product_price) as Price by product_name product_id
| table product_name product_id count Price
| eval revenue=count*Price
| fields product_name revenue
| rename product_name as "Product" revenue as "Revenue"
| sort -Revenue
```

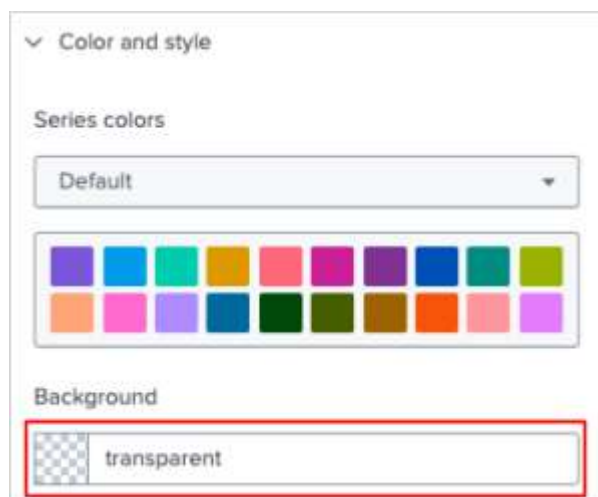

3. For the **Data source name** put '**Revenue by Product search**'.

Data source name

Revenue by Product search

4. Set the **Time range** to **Input**.
5. Click on **Apply & Close**.
6. Title your pie chart **Revenue by Product** and leave the description box empty.
7. In the **Color and style** section of the **Configuration** panel, change the **Background** to **transparent**.

Color and style

Series colors

Default

Background

transparent

8. Move and resize your pie chart to center it on the bottom left gray rectangle.

## Add a Column Chart

9. Click on the add chart icon (  ) in the editing toolbar, and then select **Column**.
10. Create a search as you did previously (Select data source > click on **+ Create search**) and add the following search into the **SPL query** box:

```
index=main sourcetype=access_combined action=purchase status=200
| lookup product_codes.csv product_id
| fields _time category clientip
| timechart count by category
```

11. Name the data source **Purchase Trends search**.
12. Set the **Time range** to **Input**.
13. Check the **Access search results or metadata** box.

14. Click on **Apply & Close**.
15. Title your chart **Purchase Trends** and leave the description box empty.
16. In the **Configuration** panel, follow these steps:

- a. In the **Color and style** section change the **Background** to **transparent**.

- b. In the **Data display** section change the **Stack Mode** to **Stacked**. The stacked option builds the area for each value vertically on top of one another instead of creating layers beginning at the x-axis.

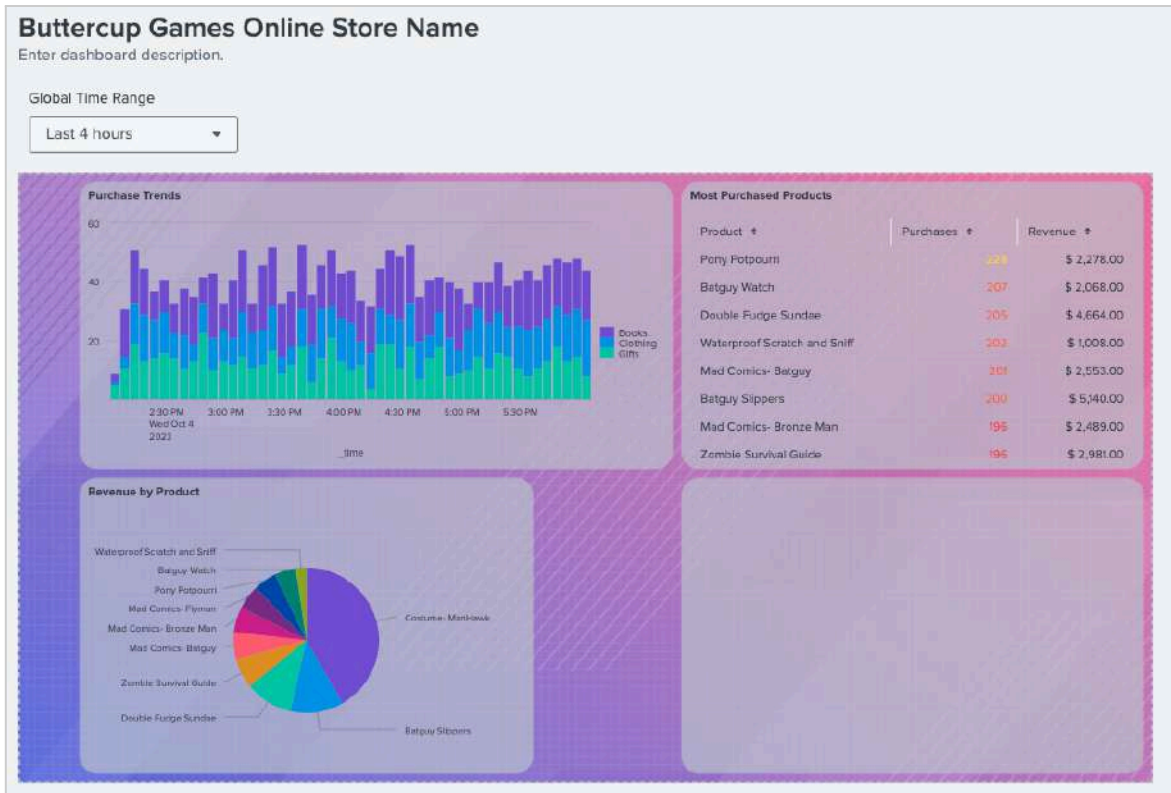

- c. In the **Legend** section change the **Legend display** to **Bottom**.

17. Move and resize your column chart to the center of the top left gray rectangle and save your dashboard.

At this point in the workshop, the Buttercup Games dashboard looks like this:

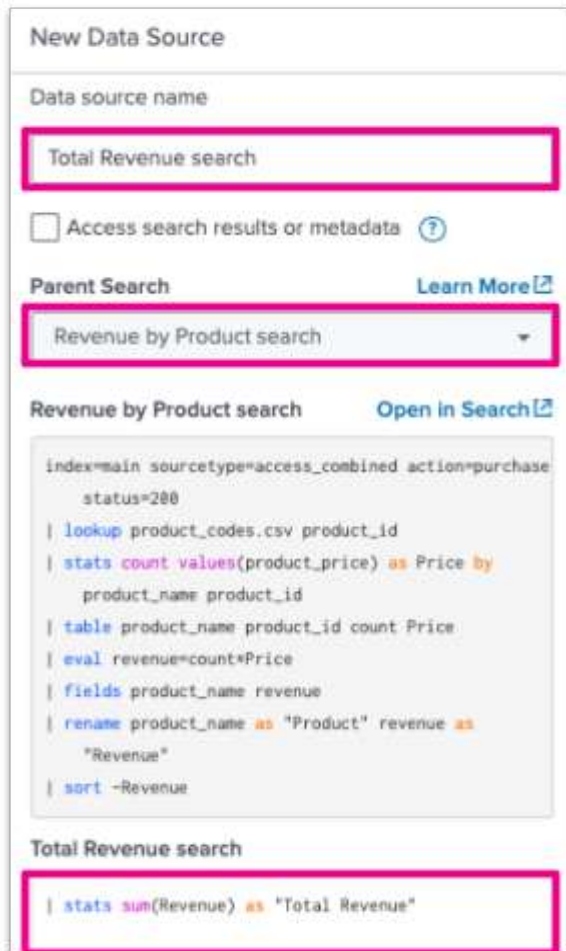

## Lab 4 – Create a Chain Search

### Create a Chain Search

1. In the **Data source overview** () panel, select **+ Create Chain Search**.
2. For the **Data Source Name** put **Total Revenue search** and for the **Parent Search** select **Revenue by Product search**.
3. Add your extended search into the **Total Revenue search** box:

```
| stats sum(Revenue) as "Total Revenue"
```

4. Click on **Apply & Close**.

**New Data Source**

Data source name

Total Revenue search

☐ Access search results or metadata [?](#)

Parent Search [Learn More](#)

Revenue by Product search

```
index=main sourcetype=access_combined action=purchase
status=200
| lookup product_codes.csv product_id
| stats count values(product_price) as Price by
product_name product_id
| table product_name product_id count Price
| eval revenue=count*Price
| fields product_name revenue
| rename product_name as "Product" revenue as
"Revenue"
| sort -Revenue
```

Total Revenue search

```
| stats sum(Revenue) as "Total Revenue"
```

## Add a Single Value Visualization

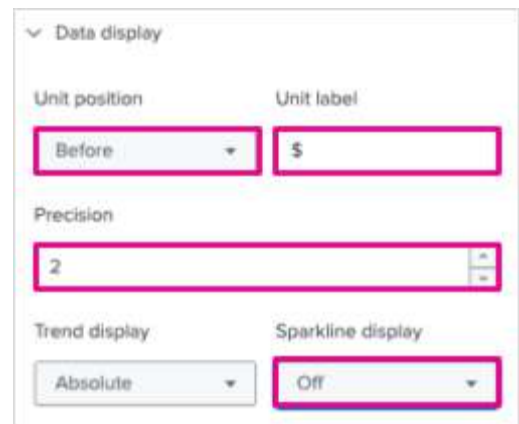

- Click on the add chart icon (  ) in the editing toolbar, and then select **Single Value**.
- In the **Select Data** panel, under the **Chain Search** section, click on **Total Revenue search (Unused)**.

- Under the **Data configurations** section, for the **Value** select **Total Revenue (number)**.

- Under the **Data display** section, set the following:
  - Change the **Unit Position** to **Before**.
  - For the **Unit Label** enter a dollar symbol (\$).
  - Increase the **Precision** value to **2**.
  - Set **Sparkline display** to **Off**.

- Under the **Color and style** section, set the following:
  - Change the **Major value** to **#53a051**
  - Change the **Background** to **transparent**.

- Move and resize the single value so that it fits inside the bottom right corner box of your dashboard.

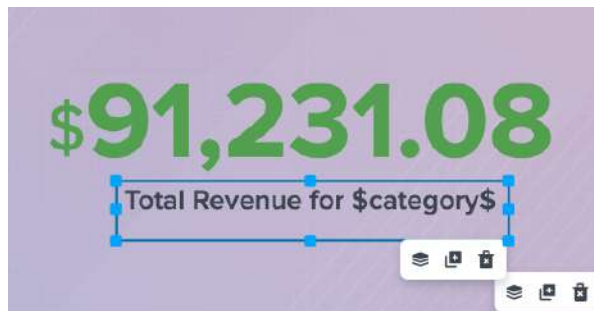

11. In the main toolbar click the markdown (  ) button.

12. Type **# Total Revenue for \$category\$** into the **Markdown content** text box.

**Note:** The # makes the text extra large.

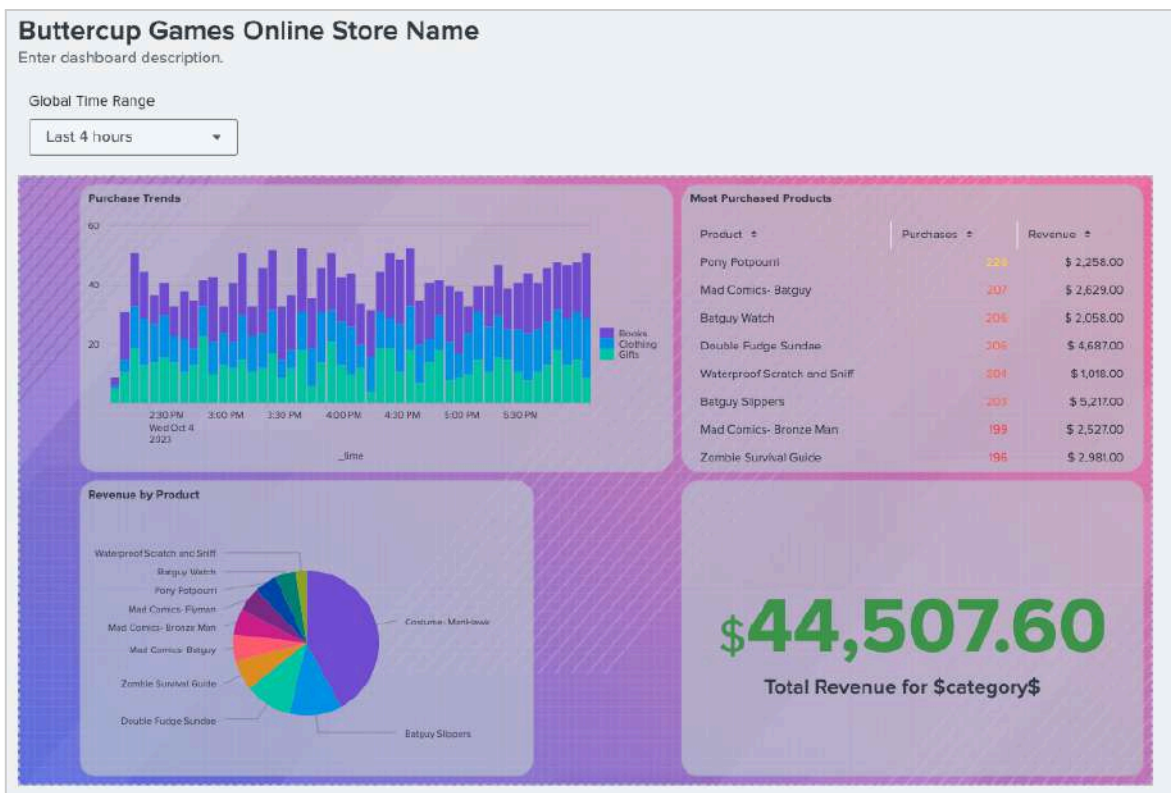

13. Place the title beneath the total revenue visualization.

14. Click on the **Save** button in the top right corner.

**At this point in the workshop, the Buttercup Games dashboard looks like this:**

## Lab 5 – Setup Annotations and Token

1. Click on your **Purchase Trends** chart. Under **Data sources**, select, **+ Set up annotation data source**.
2. Click on **+ Create search** and add the following into the **SPL query** box:

```
| makeresults count=1  
| streamstats count  
| eval annotation_label= case(count=1 ,"Book Sale Starts")  
| eval _time=now()-count*2000
```

3. Set the **Time range** to **Input**.
4. Name the data source **Book Sale**.
5. Click on **Apply & Close**.
6. With your **Purchase Trends** chart still selected, under the **Data configurations** section, for **Annotation x** select **\_time (time)**.
7. For **Annotation labels** choose **annotation\_label (string)**

## Configure Searches with an Input Token

8. In the **Configuration** panel, scroll down to **Interactions**.
9. Click on **+ Add interaction** and from the **On click** dropdown select **Set tokens**
10. Set the following:
  - a. Set the **Token name** to **category**
  - b. Set the **Token value** to **name**
  - c. Set the **Default value** to **\***

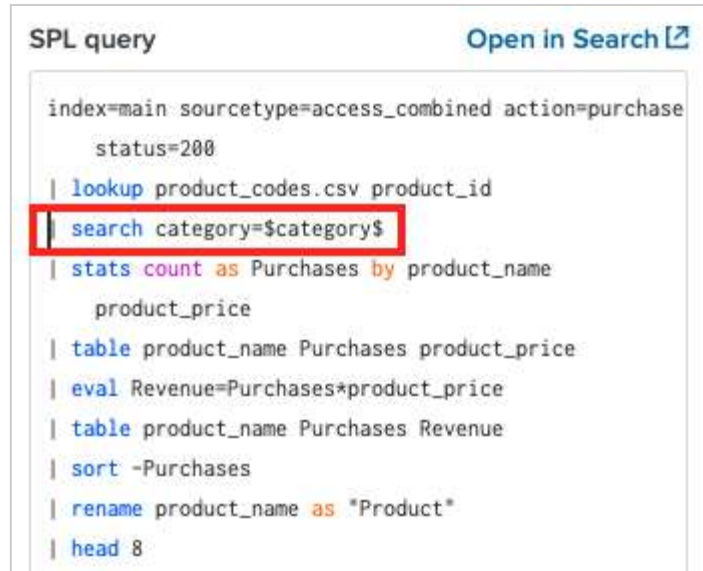

11. Click on **Apply**.

12. Select the **Data source overview** icon (  ) and open the **Most Purchased Products** search with the edit icon.

13. Add your input token to the search by copying and pasting the following SPL after the | `lookup...` line:

```
| search category=$category$
```

The screenshot shows the Splunk SPL query editor. The query is as follows:

```
SPL query Open in Search  
index=main sourcetype=access_combined action=purchase  
status=200  
| lookup product_codes.csv product_id  
| search category=$category$  
| stats count as Purchases by product_name  
product_price  
| table product_name Purchases product_price  
| eval Revenue=Purchases*product_price  
| table product_name Purchases Revenue  
| sort -Purchases  
| rename product_name as *Product*  
| head 8
```

The line `| search category=$category$` is highlighted with a red box.

14. Click on **Apply & Close**.

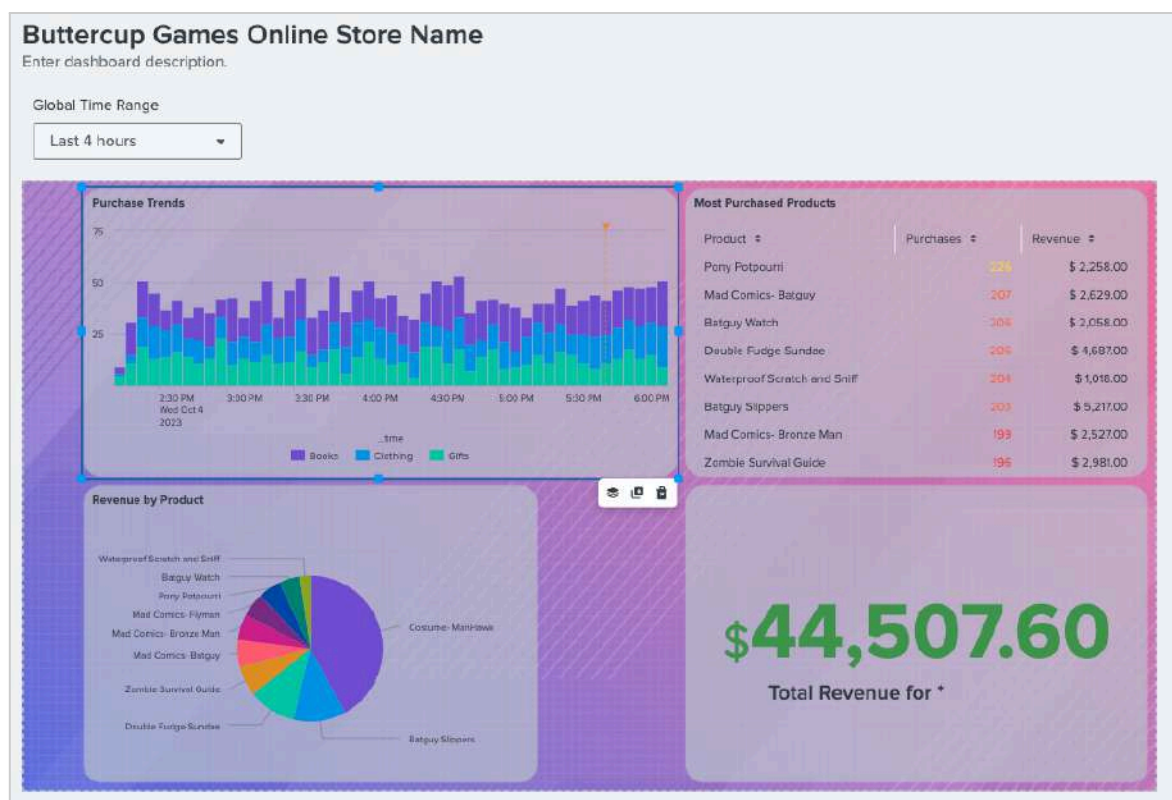

15. Repeat steps 12–14 for **Revenue by Product** search

**Note:** Your visualizations may disappear and say 'No search results returned'. That's okay!

16. Save your dashboard and click on **View** to view your dashboard.

17. Click on a category on the **Purchase Trends** chart to see your visualizations update!

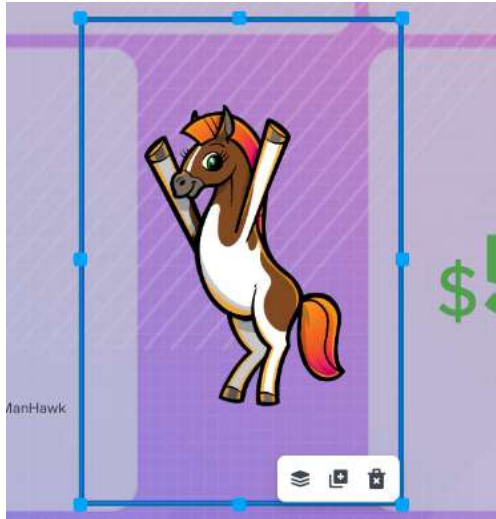

At this point in the workshop, the Buttercup Games dashboard looks like this:

## Lab 6 – Polish Up the Dashboard

### Add Some “Pizazz”!

1. Download the **ButtercupMascot.png** custom image: <https://splk.it/Buttercup-Mascot>
2. Select the add image icon (  ) in the editing toolbar.
3. Using the Configuration panel, under **Image content**, click on **upload file...** and upload the **ButtercupMascot.png** file.
4. Resize and position the Buttercup mascot between the two bottom panels.

5. Select the Buttercup Mascot, and under **Interactions** click on **+ Add interaction**
6. In the **On click** dropdown, select **Link to custom URL**
7. In the **URL** box type: **<https://www.splunk.com>**
8. Check the **Open in a new tab** box
9. Click **Apply**

Configuration

On click

Link to custom URL

URL

<https://www.splunk.com>

Use a relative URL or absolute URL, for example, /app/search/datasets, or <https://www.splunk.com>

☒ Open in new tab

10. **Save** the dashboard and view it. Click on Buttercup and see what happens!

## Add a Shape

- Put your dashboard back into edit mode and using the editing toolbar, add an ellipse by clicking the **Add Shape** (  ) button.
- Adjust the color and opacity of the ellipse by opening the **Source code** section in the **Configuration** panel:

```
"options": {  
  "stroke": "transparent",  
  "fillOpacity": 0.2,  
  "fill": "#000000",  
  "strokeColor": "transparent",  
  "fillColor": "#000000"  
},
```

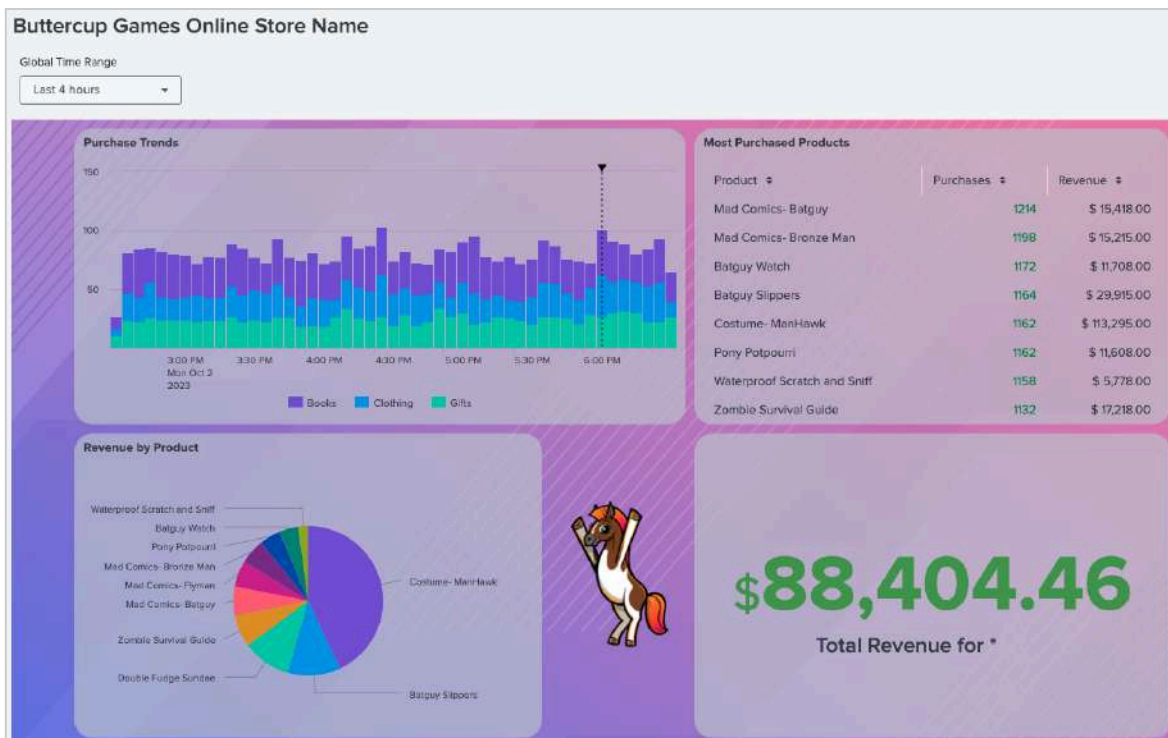

- Resize and position the ellipse beneath the Buttercup mascot for a shadowing effect.

**Note:** You can also use the Buttercup mascot's action panel to layer the mascot in front of the ellipse.

## Completed Dashboard

**Congratulations – you finished! At this point your dashboard should look like this:**

---

**Note:** Check out our resources on [Dashboard Design Best Practices](#) and [Visualization Choices and Configurations](#)
